

I am a licensed counselor for a community mental health facility. My present job involves driving 100 to 150 miles every day. During my driving time I listen to K-LOVE for news and the pleasure of listening to meaningful lyrics while I go to and from work areas. My job takes up most of my time so I focus on Jesus Christ and nurture my spiritual self by listening to K-LOVE. It is this time with God which allows me strength to worship Him through my work every day as I encourage hope in those who are hopeless.

Many others who serve this and other communities are also depending upon K-LOVE for its uplifting and encouraging programming. K-LOVE is an important part of preparing ministers, counselors and other community servants to let God work through them to help others. I believe that it is in the public interest, in general, for K-LOVE to remain on the air in our communities for this reason. It also gives our children music to listen to that is free from vulgar and distasteful language.
